SUMMARY

Computer Science engineer transforming academic projects into full-stack AI applications, leveraging experience from an IBM-backed AI internship and self-built projects in cybersecurity, NLP, and career-tech to drive innovative solutions that bridge theoretical curiosity with practical discipline.

EDUCATION

Geethanjali College Of Engineering And Technology | CGPA: 8.5

B.Tech | Computer Science & Engineering

Resonance Junior College, Hyderabad | Percentage: 96.00%

Senior Secondary (XII) | MPC

Foster Billabong High International School | 96%

CBSE

PROFESSIONAL EXPERIENCE

Software Engineering Intern | YugaYatra Retail

May 2026 - July 2026

- Contributed to software development as a Software Engineering Intern at YugaYatra Retail, enhancing team output.

AI Internship | IBM

Jan 2025

- Completed a 3-month IBM internship on 'AI & Cloud Technologies'.

TECHNICAL SKILLS

Languages: Python, Java, C#, JavaScript, HTML, CSS, C

Developer Tools: VS Code, Git, GitHub

Soft Skills: Data Structures, Problem Solving, Communication Skills

KEY PROJECTS

Adaptive Online Machine Learning for Real-Time Cybersecurity Anomaly Detection

- Developing an AI-powered cybersecurity system to detect network anomalies and evolving cyber threats using machine learning.
- Covered incremental learning architectures, drift-detection strategies, and trade-offs versus static batch-trained models for evolving threat landscapes.

Butterfly Effect Simulator

- Built an interactive simulator that models how small changes in initial conditions cascade into significantly different outcomes over time, visualizing sensitive dependence on initial conditions in dynamical systems.

Flash Cards Generator

- Built an AI-powered smart study companion that automatically extracts core definitions and concepts from user notes.
- Implemented intelligent memory organization and spaced-repetition study methods using AI.

Community Resource Sharing

- Designed a resource-sharing platform using design thinking and user research, and built a prototype enabling users to share and access community resources.

AI Career Coach

- Developed an interactive, AI-driven guidance platform that conducts mock interviews and analyzes resumes to suggest career roadmaps.

CERTIFICATIONS

Cyber Security with AI | Internshala Trainings

- Training covering core cybersecurity concepts alongside AI-driven approaches to threat detection and defense.

Web Development with AI | Internshala Trainings

- Successfully completed an 8-week online certified training on Web Development with AI, covering HTML, CSS, Bootstrap, DBMS, PHP, JS, React, a final project, and AI in Web Development modules.
- Scored 76% in the final assessment.

Java Programming | NPTEL Swayam

- Earned a Gold Medal (top performance tier) from NPTEL for this course.

C For Everybody | Udemy

EXTRA CURRICULAR

- * Member of technical communities.
- * Participated in coding competitions.
- * Attended AI and software development workshops.
